

The best in life is a smile from our child!

Our wish is to keep this special smile always shining

DAISY HORIZONTAL

This „squeaky“ duck promotes fine motor skills and stimulates the will for movement.

The Daisy Horizontal has been conceived to stabilize the hand or to hold on for small children. The yellow duck makes children curious and stimulates them too seize it and to squeeze it. Thus our little treasures can playfully and quite incidentally train their fine-motor skills.

*Product number: 02955

DAISY VARIO

The merrily squeaking Daisy is the ideal assistance e.g. on the therapy table of a wheelchair.

The Daisy Vario stimulates the joy of movement. It can be fixed in the desired position by the Mobeli latching system: horizontally, vertically, and bent 45° to the left or right. The possibility of variable adjustment allows the grip inclination to be fine-tuned for an optimal grip position which is particularly helpful for an eased hand position, e.g. very important for spasticities or contractures.

*Product number: 02965

MEASUREMENTS:

	Grip diameter in mm	Nominal load
Daisy Horizontal	26	10 kg
Daisy Vario	26	15 kg

The 26 mm handle diameter is designed especially for small children's hands.

The best in life is a smile from our child!

Our wish is to keep this special smile always shining

SOFT CUSHION FOR FOREFOOT

Splayfoot-vegetable tanned calfskin ceiling insole.

Pleasurable supporting effect while walking and standing. A longsole foam rubber insole with splayfoot pad and support for the longitudinal arch. Covered with finest calf leather, vegetable tanning, extra gentle to the foot.
