LED MOBIL

With the SCHWEIZER LED Hand Held Magnifier, you have a diverse choice of magnifications.

A range of 3 different magnifications between 4 and 8 diopters covers all types of vision needed. The large light weight aspheric lens, for instance with its 4D is recommended for long reading while the 8D lens is suitable for users with very low vision. It has a light weight aspheric lens and a very bright homogeneous and contrast free lighting. The magnifier has a simple press battery release system to provide easy access to change the three AAA 1,5 Volt batteries.

FACTS & TECHNICAL DATA:

- Very bright, homogeneous and contrast free lighting
- Energy saving LED
- Aspheric lens
- Exceptional quality
- Available in 3 different specifications:
 - LED Mobile 4D/Ø 70 mm
 - LED Mobile 6D/Ø 55 mm
 - LED Mobile 8D/Ø 35 mm

COLOR: anthracite

*Product numbers: Ø 70 mm: 09104
 Ø 55 mm: 09106
 Ø 35 mm: 09108

BAR MAGNIFIERS

Bar Magnifiers are ideal for reading letters, books and newspapers.

As the magnifiers enlarge a complete line at time they allow better reading flow and the integrated line helps with retaining focus on the correct text. Also designed for reading computer printouts and other detailed work. Bar magnifier only magnify in one direction, the high of the letters is therefore increased but the width remain the same. Bar magnifiers allow strainfree reading over long periods of time, magnifies in the vertical direction only.

FACTS & TECHNICAL DATA:

- Integral red guide line to aid reading
- It also can be used with glasses
- Magnify only the high of the letters
- Microfiber case included
- Available in 4 different specifications:
 - Bar magnifier from optical plastic inkl. microfiber case, 1,5x/ 200x35 mm, with red line
 - Bar magnifier from optical plastic inkl. microfiber case, 1,5x/ 330 x 35 mm, with red line
 - Bar magnifier from optical plastic inkl. microfiber case, 2x/140x20 mm
 - Bar magnifier from optical plastic inkl. microfiber case, 20cm, 200 x 25 mm
